Welcome

On behalf of the Organizing Committee, we extend you a warm welcome to the 35th International Symposium on Software Reliability Engineering (ISSRE 2024).

ISSRE is the major annual event for exchanging ideas between academic and industry thought leaders. As the leading conference of software reliability engineering, ISSRE has become more international, diverse, and inclusive. Over the past 34 years, ISSRE has published research results from more than 2,100 authors in 1,200 rigorously reviewed papers. These papers were cited more than 35,000 times, making ISSRE one of the most influential references for software engineering R&D.

ISSRE 2024 will be held in Tsukuba, Japan, from 28 to 31 October 2024. Tsukuba is the largest science city in Japan, located in southern Ibaraki Prefecture, approximately 50 kilometers from central Tokyo. Tsukuba can be accessed 45 minutes from Tokyo's Akihabara Station via the Tsukuba Express Line.

The conference will take place at the [Tsukuba International Congress Center](#). The registration site will be announced on [this page](#) once it is ready.

We look forward to meeting you in Tsukuba!

Fumio Machida
ISSRE 2024 General Chair
